

RECRUITMENT NOTICE: PROCESS ENGINEER

ABOUT JOSEPH WALSH STUDIO

Joseph Walsh Studio, situated in County Cork, Ireland, encompasses a design studio, workshop and gallery. Here art, craft, design and technical innovation merge to create monumental sculptures, one-of-a-kind site-specific commissions and collectible design editions, which are found in significant international public and private collections.

JOB DESCRIPTION

Joseph Walsh Studio seeks applications for the position of Process Engineer. Working on site, and closely with the Workshop and Design Studio teams, the successful candidate will have the following responsibilities;

- Analysing current manufacturing processes and identifying areas for improvement in efficiency, quality, and cost-effectiveness.
- Developing and implementing innovative solutions to enhance workflow, minimise waste, and optimise resource utilisation.
- Developing a new material laboratory.
- Collaboration with production teams with a view to streamlining operations and standardising procedures.
- Designing and implementing quality control measures to ensure consistent output and adherence to specifications.
- Conducting regular assessments of equipment performance and recommending maintenance or upgrades as needed.
- Providing training and support to staff on new processes and technologies.
- Remaining up to date on industry trends and advancements with a view to continuously improving production methods.

THE IDEAL CANDIDATE WILL:

- Have a Bachelor degree in engineering, preferably in mechanical, industrial, or manufacturing engineering.
- Have proven experience in process engineering within a manufacturing environment, preferably in woodworking or a comparable environment.
- Have strong analytical skills and the ability to identify inefficiencies and develop effective solutions.
- Have proficiency in CAD/CAM software and other relevant engineering tools with the potential to further develop their skills.

JOSEPHWALSH

- Have excellent communication and interpersonal skills and the ability to work effectively with cross-functional teams.
- Detail-oriented mindset with a focus on quality and continuous improvement.
- Be highly organised, have the ability to manage multiple projects simultaneously, prioritise tasks efficiently and achieve deadlines.
- Have a good knowledge of safety regulations and best practice in a workshop setting.
- Be interested in the relationship between economics and research / process development.
- Be enthusiastic and open to learning new skills.
- Have a full clean driving licence [essential].

SALARY:

Commensurate with experience
